

CURTAIN SWAP MASTER - A RELIABLE PARTNER FOR ROAD AND RAILWAY TRANSPORT

The Curtain Swap Master semi-trailer, a novelty from Wielton that consists of a swap body (BDF) and a dedicated chassis, is a versatile solution that works well in a variety of operations. The solution, designed mainly for the shipping, furniture or automotive industries, has been tailored to transport various types of cargo. A body equipped with special support legs, together with a corresponding dedicated chassis, provides a complete, certified solution for road and railway transportation.

The Curtain Swap Master, with its 7820mm length, 2480mm interior width and 2500 to 3000mm interior height, has up to 57m³ of volume. It is able to transport up to 19 pallets with one transport. The gross vehicle weight of the Curtain Swap Master by Wielton is 16 tons, of which the total weight of the body reaches 2,800 kg.

The interchangeable body is easy to use and does not take long to reload. The well-thought-out and proven design allows safe handling, loading and unloading, and the vehicle's high maneuverability makes it easy for the driver to maneuver, improving their work. The body can be transported by various vehicles, which significantly reduces the need for vehicle downtime, which translates into lower transportation costs. In addition, BDFs standing on their supports can also serve as mobile storage areas. The vehicle is XL/VDI certified. It ensures that the body structure meets durability standards, so that the transportation of cargo of this type does not require additional protection.

Wielton uses modern hybrid welding and cataphoretic painting technologies in vehicle production. Thanks to the use of such solutions, welds are made accurately and precisely, and the frame structure is characterized by strength and high resistance to corrosion. Trailers made in this way will perform well even in the most difficult conditions of use, as confirmed by the results of advanced tests conducted at Wielton's Research and Development Department.

Curtain Swap Master can be viewed at Wielton's indoor booth - Hall 1, booth No. A111.
